PROFILE

Full-stack software developer with 5+ years of experience building and shipping production web systems across backend, frontend, DevOps and CMS. Lead Software Developer at Tizeti Network Limited, leading development of Tizeti OS, an in-house ERP spanning 18 departments across a multi-country operation, and owning full-stack delivery across Hotspot / Express Wi-Fi, WiFiCall, Free Fiber Africa and Tizeti Cloud. Works across React, Next.js, Vue.js and TypeScript on the front end and Node.js, PHP (including Laravel), Python (FastAPI) and MySQL on the back end, with CI/CD on AWS, Vercel, Render and DigitalOcean. Has led a team of 6 developers across 3 countries, runs code reviews and mentors junior and mid-level developers. Also integrates LLMs (Claude API with tool use, self-hosted Ollama models, OpenAI) into real products, builds and ships own products such as FileFlowHQ and TourFinderApp, and is top contributor to the Laravel-based Fantasy Showdown platform. Strong UI/UX and visual design skills, including prototyping with Google Stitch and v0.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Vue.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap, shadcn/ui, Material UI, Framer Motion

Backend: Node.js, Express, Laravel (PHP), PHP, Python (FastAPI), REST APIs, GraphQL, MySQL, Firebase, Supabase

AI / LLM Integration: Claude API (including tool use), Ollama (self-hosted, fine-tuned models), hybrid LLM routing, ChatGPT / OpenAI API for prompt design, AI-assisted backend scaffolding and content workflows, Dialogflow; GitHub Copilot, v0 and Google Stitch for prototyping and UI / UX

Full-Stack Architecture: end-to-end feature ownership (API design through UI, auth, payment integrations, role-based access)

ERP & Business Systems: custom ERP development, procurement / requisition workflows, inventory and asset management, HR / leave systems, field-operations scheduling, multi-level approval chains, invoicing

DevOps & Deployment: AWS (CodeCommit, S3), Vercel (incl. serverless functions), Render, DigitalOcean (App Platform, Spaces, Droplets), Nginx, SSL, Cloudflare, Bitbucket Pipelines, CI/CD, Git, env / config management, performance and caching optimisation

CMS & Content Workflows: content-driven site architecture, admin / content management panels, structured content modelling, CMS integration and customisation, WordPress (manage wifi.com.ng)

State Management: React Query, Redux, Context API

Mobile & Testing: Capacitor (iOS / Android), Flutter, Jest, Vitest, React Testing Library

Integrations: Paystack, Flutterwave, Google Maps, MapLibre GL, Leaflet, OpenStreetMap, Cloudinary, Resend, Mailgun, Mailjet, WhatsApp Cloud API, Adobe PDF Services

SEO: on-page SEO, Open Graph / Twitter cards, structured data (JSON-LD), prerendering SPA routes, Google Analytics

Design: UI / UX design, visual and brand design, prototyping with Google Stitch and v0, Canva (see [Design Portfolio](#))

Other: UI / UX Design, Modular Components, Reusable Hooks, Responsive Design, Agile, Jira

PROFESSIONAL EXPERIENCE

Lead Software Developer — Tizeti Network Limited, Lagos

02/2025 – Present

- Lead development of **Tizeti OS**, the in-house ERP spanning 18 departments (procurement, accounts, requisitions, inventory / assets, stores, HR / leave, field installations / scheduling, compliance / KYC, sales, network operations) across a multi-country operation; top contributor to the platform.
- Digitised procurement, requisition and leave approval workflows with multi-level approval chains up to executive level (CIO / COO).
- Built field-operations tooling: engineer scheduling, installation SLA / time tracking and automated PDF reports.
- Own full-stack delivery across Hotspot, WiFiCall and Free Fiber Africa (React / TypeScript / Vue front ends, Node.js / PHP back ends), including PHP development on Tizeti Hotspot (hotspot.tizeti.com, also known as Express Wi-Fi) and the company careers portal (tizeti.com/careers).
- Design and deploy backend APIs and services alongside modular, reusable frontend components, keeping frontend and backend contracts consistent.
- Set and enforce UI / UX and system-design standards across products, including CMS-style admin and content-management interfaces.
- Fixed a slow Tizeti Hotspot country view caused by a hardcoded 1,000-record pagination limit.

- Built the **Tizeti Cloud** customer portal (tizeti.com/cloud): marketing site, plans, registration with live Paystack billing, and customer dashboard.
- Manage CI/CD on AWS / Vercel / Render, with AI-assisted workflows for config, debugging and release checks.
- Manage source control on AWS CodeCommit across Tizeti OS, Tizeti Cloud, Free Fiber Africa, Hotspot / Express Wi-Fi and wifi.com.ng.
- Mentor junior and mid-level developers; lead code reviews and architecture / ER-model discussions.
- Reduced load times by 30% through caching, reusable components and query optimisation.
- Built the fiber operations suite in Tizeti OS: fiber customer management, wireless-to-fiber migration flow, splitter assignment, network mapping and fiber support complaints.
- Built field-engineer workflows, a customer feedback / QA testing dashboard, a retention-agents module, mail-blast campaigns and a marketing data-analysis flow.
- Worked on Hotspot / Express Wi-Fi (hotspot.tizeti.com, Vue.js / PHP): redesigned the retailer / RDE interface and fixed auth, pagination and search bugs.
- Added speed-test and coverage-search features to Free Fiber Africa.

Lead Frontend Developer — Tizeti Network Limited, Lagos

12/2023 – 02/2025

- Led **6 developers** digitalising departmental workflows on Tizeti OS (React, Vue, PHP, Tailwind CSS, Material UI) across 3 countries.
- Built role-based access and KYC compliance workflows across departments.
- Built secure authentication systems and payment gateways.
- Code reviews cut issue rates by 50%.
- Ran the team's Git workflow on AWS CodeCommit (feature branches, PR reviews, merges).
- Started the procurement module in Tizeti OS (bad-device reporting, payment-reference tracking).
- Built the leave-request flow with executive approvals, KYC compliance workflows, and customer relocation, support-visit and installation-verification modules.
- Took over freefiber.africa: signup flow, country-specific KYC (e.g. Ghana ID types) and referral programme.
- Led product demos, technical documentation, and design / architecture discussions.

Frontend Developer — Tizeti Network Limited (remote)

03/2022 – 12/2023

- Built responsive web applications with React.js, Bootstrap, JavaScript, TypeScript and Tailwind CSS.
- Designed and implemented end-to-end secure payment gateways and user-facing dashboards.
- Partnered with designers and backend engineers on UI / UX consistency and API integration.
- Debugged and optimised applications, reducing issue rates by 30%.
- Maintained wifi.com.ng on **WordPress** and built its React signup and regional pricing flows, with state-by-state plans (Lagos, Abuja, Port Harcourt).
- Integrated Paystack with server-side verification.
- Built FSE / sales flows in Tizeti OS.
- Worked on the new-system rollout (routing, sidebars), map clustering and Google Translate support.

NYSC Frontend Developer — Tizeti Network Limited (remote)

03/2021 – 02/2022

- Developed responsive applications using React.js, Redux, PHP and TypeScript.
- Implemented secure payment gateways and integrated REST APIs.
- Optimised debugging processes, reducing issue rates by 30%.

Intern — Safe Complex Multi-Biz Limited, Ibadan / remote

03/2019 – 09/2020

- Developed and maintained responsive web applications using HTML, CSS and JavaScript.
- Built product showcase pages and digital branding assets.

PROJECTS

- **FileFlowHQ** (fileflowhq.com) — Cross-platform file conversion suite, solo-built for web, iOS and Android, with 11 tools (image / PDF conversion and compression, merge / split PDF, PDF to Word, document scanner, QR / barcode scanner, CSV / JSON). Most processing is client-side for privacy and near-zero server cost; Vercel serverless functions for Adobe PDF Services and Mailjet.
- **TourFinderApp** (tourfinderapp-eight.vercel.app) — Conversational AI travel guide (food, landmarks, transport, safety, places to stay). Hybrid LLM routing on a Python / FastAPI backend: a self-hosted fine-tuned Ollama model for simple questions, Claude for safety-critical, time-sensitive and place-lookup queries. Claude tool-use loop for place search (OpenStreetMap, optionally Google Places) with web-search fallback, IP-based location, persistent sessions and free-plan usage metering. A rebuild of "Mobot", my Bowen University final-year project.
- **MAD — Mindfully Articulated Design** (mindfullyarticulated.com) — Design-led website for MAD (Mindfully Articulated Design), a product, marketing and design firm offering product design and digital solutions, brand identity and branding systems, UI / UX design, web development and marketing. Node.js content platform / creative agency site with a custom admin panel, live-edit CMS panel, session authentication and image uploads to DigitalOcean Spaces; deploys via Bitbucket Pipelines to DigitalOcean App Platform. **Skills:** React.js, Node.js, CMS Architecture, Admin Panel Development, Content Modeling.

- **Volasec (volasec.com)** — Conversion-focused multi-page website for a security and compliance consultancy (SOC 2, ISO 27001, cloud security architecture, risk assessments), with structured service messaging, responsive layout and SEO metadata. **Skills:** React.js, Tailwind CSS, UI / UX Strategy, Conversion Architecture, Brand System.
- **Abánítúnrásé (abanitunrase.com)** — E-commerce and booking platform for a styling house (bridal styling, occasion looks, Kájáyelo travel wardrobe curation): Paystack with server-side verification, Cloudinary signed uploads, Resend email, WhatsApp Cloud API notifications, custom admin dashboard, online product sales and appointment scheduling. **Skills:** React.js, Tailwind CSS, E-Commerce, Booking / Scheduling System, UI / UX Design, Responsive Design.
- **Chi Farms (chi-farms.com)** — Agro-industrial corporate website: landing page for a vertically integrated poultry and aquaculture company, emphasising operational scale and modular UI. **Skills:** React.js, Node.js, Tailwind CSS, UI / UX Design, Responsive Layouts, Modular Components, Resend API, SEO Optimization.
- **Fantasy Showdown (fshowdown.com)** — Real-money fantasy football on official FPL data: wallet funding, BVN-verified withdrawals, subscription pots, head-to-head and group matchmaking, automated payouts. Took over an existing Laravel codebase via handover and am now top contributor across the Laravel API and React user / admin apps. Built wallet funding and withdrawals, Paystack / Flutterwave with webhooks, a scheduler-driven game engine and an analytics suite. Set up SSL on DigitalOcean (SSH / Nginx), migrated the admin app from CRA to Vite with Jest, deploys via Bitbucket Pipelines. **Skills:** React.js, Laravel (PHP), REST APIs, Paystack / Flutterwave, AI-assisted backend scaffolding, CI/CD (AWS / Vercel / Render).

EDUCATION

B.Sc. Computer Science & Information Technology, Second Class Upper Honours — Bowen University, Iwo (2016 – 2020)

Social Director, Computer Science Department (2019 – 2020)

Final-year project: *Tourist Guide Chatbot: A Case Study of Ibadan Metropolis* (Mobot), built with Flutter and Dialogflow

CERTIFICATIONS

Meta Full Stack Developer: Front-End & Back-End from Scratch Specialization — Meta | Coursera, 2026

Introduction to Front-End Development — Meta | Coursera, 2026

Cisco Certified Network Associate (Online Training Certificate of Completion) — August 2020

SoloLearn PHP Course — Project Management Certification, July 2019

Google Digital Skills for Africa — October 2018

National Youth Service Corps Certificate — February 2022

Institute of Personal Development and Customer Relationship Management (IPCDRM), Qatar — 2025
